POWER PROJECT AT KAJIADO COUNTY

COMPLETION OF A 15.4KWP SOLAR PV
SYSTEM AT ASTRADENTAL SERVICES
LTD IN KENYA

PARTICIPATION IN MAJOR
EXHIBITIONS AND ACTIVATIONS

Editor's Note

Warm greetings from Sentimental Energy Company.

The end of June marks the end of the first half of the calendar year, and we take this chance to reflect on the year so far.

We're excited to highlight the over 200Kwp solar energy systems installed so far this month and the tremendous impact they continue to have on reduced energy bills and reliable power.

Our vision to provide affordable and reliable energy for all is still on course and we cannot thank you enough for your continued support!

30th June 2024

SENTEC COMMISSIONS A 190KWP SOLAR POWER PLANT AT KAJIADO COUNTY HEADQUARTERS

As electricity costs soar across the nation, Kajiado County Government has taken a bold step towards renewable energy, embracing solar power to reduce reliance on the traditional grid and cut down the hefty electricity expenses, which nearly reach KES 10,000,000.

In collaboration with Northlands Energy, we have launched a cutting-edge 190kWp solar plant equipped with a 310kWh battery energy storage system (BESS). This groundbreaking initiative not only grants the county offices power independence but also sets a new benchmark for energy efficiency, saving over Kshs 10 million in monthly electricity bills. This solar plant is a shining example of how innovative solutions can drive economic and environmental benefits simultaneously.

Our skilled technical team installed this state-of-the-art solar power plant in a remarkable 12 days, showcasing not only speed and efficiency but also a high level of expertise in managing large-scale projects. This achievement highlights our commitment to professionalism and excellence in the renewable energy sector.

The rapid deployment of this plant underscores our ability to deliver transformative energy solutions that pave the way for a sustainable and economically sound future.

SENTEC COMMISSIONS A 15.4KWP SOLAR PV SYSTEM AT ASTRADENTAL SERVICES LTD IN KENYA.

Reliable and cost-effective electricity remains a pressing challenge for the healthcare sector in our country. Frequent power interruptions and soaring electricity bills continue to hamper the efficiency and effectiveness of healthcare services. Recognizing this critical issue, we at Sentimental Energy have made significant strides in tailoring our technical design and installation processes to meet the unique demands of the healthcare sector.

This June, we are thrilled to announce the successful completion of a 15.4kWp Solar PV System at Astradental Services Ltd in Kenya. This project underscores Astradental Services' unwavering dedication to achieving 100% clean energy in their operations. By integrating sustainable solutions into their daily activities, they are significantly reducing their energy costs and setting a powerful example for others in the healthcare industry.

This project at Astradental Services Ltd highlights our commitment to fostering sustainable development and supporting the essential pillars of our community. By championing clean energy, we are not only helping our clients reduce costs but also contributing to a healthier, more resilient healthcare system.

ACTIVATION EVENT AT THE KITALE MEGA CENTRE

We are excited to share the success of our recent activation event at the Kitale Mega Centre, led by our dynamic Western region team. This event showcased our commitment to bringing sustainable energy solutions closer to the community, offering firsthand experience and information about our innovative solar products and services. Attendees had the opportunity to engage with our experts, learn about the benefits of solar energy, and explore how they can integrate these solutions into their homes and businesses.

Our presence in the Western region is further strengthened by our dedicated office in Bungoma County, located in Kimilili. This strategic location enables us to provide exceptional service and support to our clients in the region, ensuring they have access to reliable, cost-effective, and sustainable energy solutions.

47TH KCB/KESSHA ANNUAL NATIONAL CONFERENCE OF PRINCIPALS AND EXHIBITION

We were honored to participate in the 47th KCB/KESSHA Annual National Conference of Principals and Exhibition in Mombasa, a significant event that brought together education leaders from across the country. Our presence at this conference highlighted the vital role that solar energy can play in transforming schools by reducing electricity costs and ensuring reliable power.

Our participation in the conference and exhibition allowed us to engage directly with school principals, sharing insights on how these solar solutions can be seamlessly integrated into their institutions. We are committed to supporting schools in their journey towards sustainable energy use, ensuring they reap the benefits of cost savings and power reliability.
