

SENTEC ENERGY

29th February 2024

NEWSLETTER

Dear Sentec Community,

As we welcome another month, we're delighted to reconnect with you, our valued clients and share the latest happenings at Sentec. In this edition of our newsletter, we have exciting updates, insightful stories, and announcements that we can't wait to bring to your attention.

KITENGELA OFFICE

"Saturday, February 10th, marked a momentous occasion for us as we welcomed a new addition to our family," shared Eng: Paul Simiyu, our Managing Director. The excitement was palpable as our management team ceremoniously cut the green ribbon, officially inaugurating our Kitengela Office. It was a beautiful moment witnessing the promotion of our own Bonnke Mulaama and Mutua Telvin to the positions of Branch Manager and Lead Technician, respectively.

In just two weeks since the opening, we've completed four residential projects in the areas of Syokimau, Kitengela and Yukos showcasing our exceptional expertise and desire to serve our clients in the region. We eagerly anticipate what the future holds for us. If you missed any of our highlights, be sure to check our social media channels for more information. Here is the link to the Grand Opening ceremony: <https://t.ly/J7zIC>

HOSPITALITY SECTOR REAPING FROM SOLAR SOLUTIONS

In the western region, our team accomplished the installation of six 200-liter Solar Water Heating systems at Kakamega Hotel Limited. These systems efficiently serve the hotel's Laundry and Kitchen areas, enhancing their daily operations.

Similarly, in Kitale, just a few kilometers away, we successfully implemented a 55 kWp Solar PV system with a 40 kWh Battery Backup. This initiative has seen a reduction in the hotel's energy expenses. Additionally, we installed Solar Water Heating Systems for the guest cottages and swimming changing rooms, further contributing to energy savings and sustainability efforts. We are proud to play a role in ensuring that our hospitality industry stays abreast of advancements in renewable energy, promoting environmental consciousness and financial prudence.

SOLAR FOR THE MEDICAL SECTOR

Throughout our journey, we've forged valuable partnerships with various medical facilities, collaborating on numerous solar projects to address their energy needs while prioritizing uninterrupted and dependable power supply.

With our Solar Lease and Power Purchase Agreements, we've enabled these facilities to benefit from our solar solutions with minimal to zero initial investment costs, thanks to financing provided by our trusted partners. Leveraging unused roof space, we've installed our solar plants, ensuring seamless integration with existing infrastructure.

Join us and engage in the conversation to learn more about our initiatives and how we're revolutionizing the energy landscape for medical institutions.

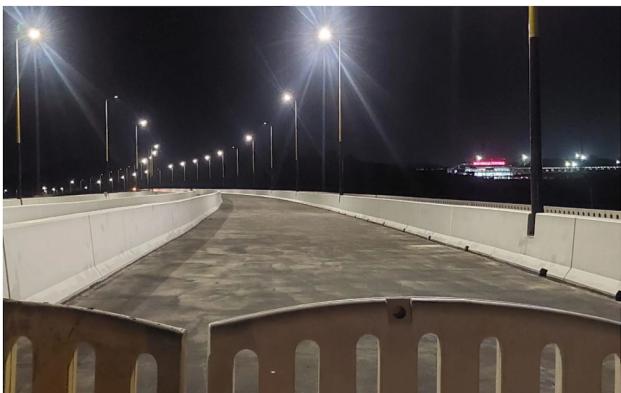

DID YOU KNOW ?

Sentimental Energy has a branch in Kimilili town, located in Bungoma County, serving the western block of Kenya. For inquiries and further information, you can reach us at +254 720 007165 or +254 795 513899. We look forward to assisting you with your energy needs.

COUNTY GOVERNMENTS STREET LIGHTING BENCHMARKING VISIT

Addressing the decarbonization of urban roads and streets through the adoption of sustainable energy lighting solutions is a top priority for county governments.

We recently conducted site meetings and basic training sessions with officials from the county governments of Nairobi, Nakuru, Busia, TransNzoia, Makueni, and Murang'a with a focus on establishing standards for road and area lighting, emphasizing sustainable solutions for the socio-economic benefits they bring, and highlighting the pivotal role of our smart 365-night solar lighting solutions.

CBF KITENGELA

Exhibitions offer a wonderful chance to engage directly with our clients and provide them with hands-on information about the solutions we provide.

We invite you to join us next Sunday, March 3rd, 2024, at the Citam Business Forum in Kitengela. Let's connect and delve deeper into how we can seamlessly integrate solar energy into our daily lives for cost-effective and dependable power solutions.
